SpaceRisk

See every risk — from the team floor to the boardroom.

Friendly ISO 31000 risk management with bowties, barriers and a monthly rhythm.

How risk flows

Team member
Logs new risks and reviews existing ones.

Team lead
Checks the team's barriers and attests the monthly return.

CEO / CISO
Gets the executive summary, heat map and financial view — as PDF or PowerPoint.

Project team
Tracks delivery, cost, safety and supplier risks.

Project manager
Reviews and submits the project's monthly return.

Portfolio view
All projects side by side, exportable for the steering group.

What you get

ISO 31000 risk register
Likelihood × consequence, inherent, residual and target ratings, appetite and treatment plans.

Monthly review cycle
Every team reviews every risk and checks every barrier it owns, then the lead submits the return.

Bowties and barrier panel
Per-risk and per-domain bowties, a barrier board and a risk × barrier matrix that reveals gaps.

Top events and consequences
See what you are really protecting against, grouped by domain, across all teams.

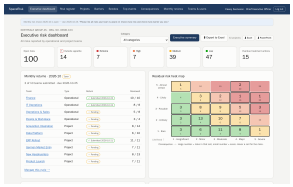

Financial perspective
Value at Risk, expected annual loss before and after barriers, and the return on every krone spent on controls.

Executive summary
Key messages written from the data, plus your own comment — ready for the board.

One-click exports
PDF, PowerPoint and Excel for every page, every team and every project.

91 sector showcases
Start with a realistic demo company from your own industry, from hospital to oil platform.
